“New Web Site - View Accident Reports on Your Phone”

STEVE YOUNG  
DESIGNATED LEGAL COUNSEL

As your Designated Legal Counsel we want you to know your rights as a railroad worker. One of the new rights is protection when reporting a personal injury.

GCOR 1.3.3 requires an injured railroad worker to report his/her injury immediately to the proper manager and complete a written injury report. The rule does not require the written report be completed immediately, but it should be completed as soon as possible after the accident/injury.

Filling out an accident report is a daunting task, as the form is a legal document that must be completed accurately. Furthermore most are unfamiliar with the form since the average worker only fills out one in his/her career. The accident report is typically used against the injured worker to claim that the railroad was not at fault or that the injured worker was the cause of the accident. So it is critical to do it right!

You can now view a sample accident report in a special format designed for **your I phone, Blackberry** or other similar device simply by using your phone browser to click on <http://www.tavorminayoung.com/ty-mobile/index.html>. The new site gives you instructions as to the right way to complete an accident report, which you can view while completing the actual report. So take advantage of this great new service.

Remember, it is against Federal Law for the railroad to discharge, discriminate, demote, suspend or reprimand an employee who reports or attempts to report a personal injury. It is also illegal for a railroad to interfere with medical or first aid treatment of an employee injured at work. Take a look at the FAQ section of our web page [www.tavorminayoung.com](http://www.tavorminayoung.com) <http://www.tavorminayoung.com> for short, concise video questions and answers about these critical issues. If you have questions, give us a call.
